HO CHI MINH CITY NATIONAL UNIVERSITY
FACULTY OF INFORMATION TECHNOLOGY

_____o0o_____

TEAMWORK REPORT
ADVANCED WEB APPLICATION
DEVELOPMENT

Lecturers:

Nguyễn Huy Khánh
Mai Anh Tuấn
Đỗ Nguyên Kha
Trần Duy Quang

Students:

Nguyễn Lê Thanh Nghĩa - 21127116
Nguyễn Gia Bảo - 21127228
Nguyễn Đức Nhã - 21127654

Table of contents

I.	GROUP INFORMATION	2
II.	GRADING CRITERIA AND SCORES	2
III.	ASSESSMENT CRITERIA AND GRADES	4
IV.	TEAM CONTRIBUTION BREAKDOWN	5

I. Group Information

Members: 3

Full Name	Student ID	Email
Nguyễn Lê Thanh Nghĩa	21127116	nltnggia21@clc.fitus.edu.vn
Nguyễn Gia Bảo	21127228	ngbao21@clc.fitus.edu.vn
Nguyễn Đức Nhã	21127654	ndnha21@clc.fitus.edu.vn

II. Grading Criteria and Scores

Features					Grade			Notes
					Point	SE*	TR*	
1	Mandatory features (10 points)							
1	1			General				
1	1	1		Reports	-3	3		
1	1	2		Demo video	-5	5		
1	1	3		Database structure and data	-3	3		
1	1	4		Website UI	-3	3		
1	1	5		Website UX	-3	3		
1	1	6		Every user input must be validated	-2	2		
1	1	7		Project structure, programming convention	-3	3		
1	1	8		Project development progress must be recorded in Git	-7	7		Every project member must commit their works to Git repos
1	1	9		Using a SPA framework/library to build the front end	-10	10		
1	1	10		The project is published to a public host	-1	0		
1	1	11		Completeness and stability	-4	4		
1	2			Frontpage				
1	2	1		Authentication and Authorization				
1	2	1	1	Use a popular authentication library or Auth service	-2	2		
1	2	1	2	Social login Google, Facebook	-1	1		At least one social login
1	2	1	3	Register an account	-0,5	0,5		
1	2	1	4	Account activation by email	-0,5	0,5		
1	2	1	5	Restrict feature access based on the user's role	-2	2		
1	2	1	6	Forgot password and renew password by email	-0,5	0,5		
1	2	2		Scheduling & Task Management				
1	2	2	1	Task Management	-0,5	0,5		
1	2	2	1	1 Add Task Functionality	-0,5	0,5		
1	2	2	1	2 View, Search, Filter, and Sort Tasks	-0,5	0,5		

1	2	2	1	3	Update and Delete Tasks	-0,5	0,5		
1	2	2	1	4	UI/UX for Task Management	-0,5	0,5		
1	2	2	2		Task Scheduling (Calendar View)	-0,5	0,5		
1	2	2	2	1	Calendar UI/UX Design	-0,5	0,5		
1	2	2	2	2	Drag and Drop Functionality	-0,5	0,5		
1	2	2	2	3	Automatic Status Update	-0,5	0,5		
1	2	2	3		AI Suggestions				
1	2	2	3	1	Analyze Schedule Functionality	-2	2		
1	2	2	3	2	Quality of AI Feedback	-0,5	0,5		
1	2	3			Focus Timer				
1	2	3	1		Start the focus timer	0,5	0,5		
1	2	3	2		During the timer session	-0,5	0,5		
1	2	3	3		End of the timer session	-0,5	0,5		
					Flow and business handling	-0,5	0,5		
1	2	4			Analytics				
1	2	4	1		Visualize user progress using focus session data	-0,5	0,5		
1	2	4	2		Display analytic information	-0,5	0,5		
1	2	4	3		AI feedback	-0,5	0,5		
2					Bonus				
2	1				AI Agent can manipulate task, timer, ... instead of suggest only	1	0		
2	2				Dockerize (development, production)	0,5	0,5		
2	3				CI/CD	0,5	0		
2	4				Highly customization	0,5	0		Switch AI services, db, infrastructure
2	5				Customize theme(Light mode & Dark mode)	0,5	0,5		
2	6				Chat bot assistance	0,5	0,5		
2	7				AI Agent suggest suitable tasks to be focused on	0,5	0,5		
2	8				AI Agent suggest suitable tasks to be added new task	0,5	0,5		

III. Assessment Criteria and Grades

Criterion	%	Grade	Evidence/Proof
Functionality	30%	29/30	All core functionalities (Task Management, Focus Timer, Analytics) were implemented and tested successfully. Minor bugs remain.
Usability & UI/UX	20%	19/20	User feedback showed a positive response to intuitive design. Some UI consistency issues need improvement.
Innovation	15%	14/15	Integration of AI-driven suggestions and analytics is innovative and effective.
Team Collaboration	15%	15/15	Regular communication and task tracking ensured smooth teamwork. All members contributed actively.
Documentation	10%	9/10	Comprehensive API documentation was provided. Some areas lack detailed user instructions.
Project Management	10%	9/10	Tasks were managed effectively with clear deadlines. Minor delays in backend optimization.

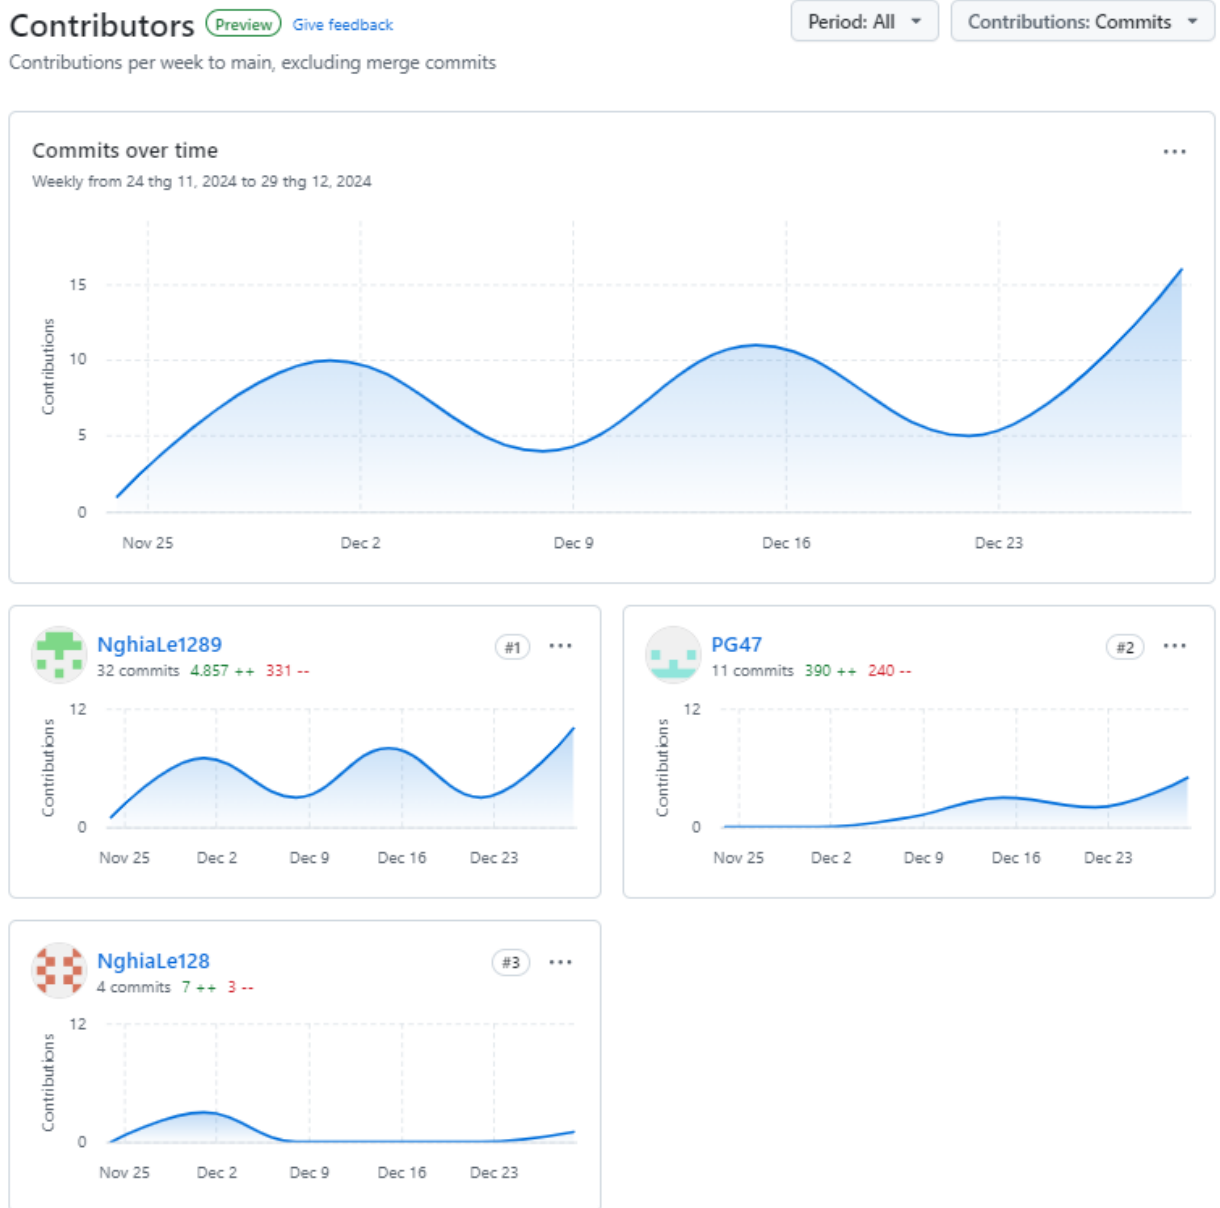

Final Project Grade: 95/100 (A)

IV. Team Contribution Breakdown

1. Contribution Percentage by Member

- Nguyễn Lê Thanh Nghĩa ([NghiaLe1289](#)): 36%
- Nguyễn Gia Bảo ([PG47](#)): 34%
- Nguyễn Đức Nhã ([CoffeMilkRock](#)): 30%

Pie chart (Backend)

Pie chart (Frontend)

2. Detailed Breakdown of Contributions

Team Member	Key Contributions	%	Evidence/Impact
Nguyễn Lê Thanh Nghĩa	- Optimized backend APIs. - Documented API responses. - Integrated AI features.	37%	Backend optimizations reduced response times by 30%. Documented flows improved developer efficiency.
Nguyễn Gia Bảo	- Enhanced Focus Timer functionality. - Improved Task Management UI. - Tested AI features.	33%	User feedback highlighted significant improvements in Focus Timer usability.
Nguyễn Đức Nhã	- Refined Analytics metrics. - Improved Profile Management. - Conducted UI testing.	30%	Analytics dashboard now provides more actionable insights, profile management flow is seamless.
